

From... 'Simpler Integrated presentation of Photo Collage Art – Chelyabinsk, July 2016

During...A Talk by: Susan M. Griffith-Jones

The name of this piece “Rainbow Symphony” is exactly what it says; sound and light merged together in union.

RAINBOW SYMPHONY

Each point of light that makes up appearance has exactly the same internal make up and we need to become familiar with this vibratory seed pattern.

Just as the seed of a flower contains the flower within it, so does this vibratory seed of potential contain the universe within it when it becomes activated.

QUESTION: So what activates it?

It is activated by how each one of us thinks.

You will see the golden spirals of the Circle of Immortality art piece that we saw just now, in here too.

These represent our thinking and here they are the motor of consciousness driving this seed of universal potential into action.

There are 2 tetrahedron shapes here too; one white and one red.

BASE OF RAINBOW SYMPHONY

Each of them has 4 points, making 8 points in total.

And the 64 triangles around the edge of the pictures are the square of 8, displaying the next level of exponential growth of the universe.

After that will be 64 squared, making 512 etc... until the entire matrix of the universe comes into being.

Consciousness shines within that matrix and whatever consciousness projects will appear.

And it can expand and contract as much as its inhabitants THINK it into being.

MEDITATION

Now I want you all to imagine you are sitting in the centre of this picture.

From your centre, you should send out vibrations that make up an 8 pointed star around you, like the one in the picture.

Please just imagine it there.

Then from each of these 8 points come another 8 pointed star, so that in total you are surrounded by 9 stars.

Can you please hold that vibration for a little while.

What we have just done is to start to create the entire universe.

But it doesn't happen that slowly, and it doesn't stop at 9 points.

Can you now imagine that in a fraction of a second, billions upon billions of these vibrations expand into space creating such a vast universal matrix that you cannot even begin to comprehend its size.

Be careful how you think, because everything and I mean every vibration you emit will have an effect on how your universe appears.

This is the absolute law of cause and effect.

Now we are being artists of reality and the true artist can paint whatever picture he or she wishes just through knowing how to play the musical instrument of consciousness.

Consciousness is energetically vibrating in different octaves of resonance, each octave pertaining to a different dimensional state of existence.

MOVIE 5: DYNAMIC HUMAN MANDALAS EXPRESSING 'RAINBOW SYMPHONY'
