

Simpler Integrated presentation of photo collage art – Chelyabinsk, July 2016

A Talk by: Susan M. Griffith-Jones

In my photo collage art, I show how the whole universe is connected to how we think.

It is necessary to understand this knowledge as it deals with how everything we sense appears.

Look around you.

I want you to imagine everything you perceive as a 0 and a 1

Let's take moment do this.

Sound is the 0 – listen around you.

And light is the 1 - look round you

Try to 'listen' and 'see' at the same time.

DO IT

M photographic artwork is the light aspect – that which you see and Marina's work is the sound aspect – that which you hear.

Today we are putting these aspects together so you can both HEAR and SEE the symbols. In this way, we will activate them.

So, when Marina sings the symbols, please focus on them and listen to her at the same time.

Why is this important?

INVITE ANSWERS

Each one of us is directly responsible for everything that appears, as nothing comes into being without us having planted the corresponding vibration of thought.

Therefore we need to be very careful how we think as that is what will appear in the world around us.

Collectively as human beings and other creatures that think, we make up the entire universe.

Knowing how to think is the basic tool we need to live life more successfully and happily, because WE are creating a more balanced world.

So how do we start this work of transforming the way we think?

Let's have a look at my first piece of photo collage art work

SHOW TWO KEYS, ONE LOCK

The name of this piece is 'Two Keys, One Lock'

Please listen to Marina singing the coded vibrations of this symbol while focusing on the picture.

MARINA SINGS

Here the 2 keys represent sound and light, where the white key is 'sound' and the blue key, 'light'.

The whole piece is the 'One Lock' representing sound and light together in union, a process you have just experienced by focusing on the picture while listening to Marina sing.

This piece shows the 5 elements – space in the centre, with wind at the bottom left corner, fire at the bottom right, earth at the top right and water at the top left.

When the whole image spins in an anti-clockwise direction, it shows the universe emerging within space and becoming gross solid appearance.

And when it spins in a clockwise direction, it shows the gross solid appearance dissolving back into space.

In reality, the spin occurs in both directions as all things are arising and dissolving simultaneously.

And space is also just an illusion of consciousness too.

AUM PIC

To take the example further, here's a piece I did entitled "Mirror of Space' where the central image is AUM, demonstrating different dimensional layers of existence.

AUM is made up of 3 Sanskrit letters; A, U and M

The M has 2 parts to it that includes a bindu point, so we can say that there are 4 aspects in total here.

You will see that the A looks like a 3, the U, a 2, the M, a 1, whereby its bindu point looks like a 0.

QUESTION: What do you think this means?

0 to 1, to 2, to 3 shows form coming into appearance out of space into gross manifest form.

Whereas 3, to 2, to 1, to 0 shows form dissolving back into space.

So here we see many layers existing at the same time, all held together perfectly in the symbolic vibration of AUM.

Imagine a Matrioshka doll. There can be many dolls existing inside what seems to be just one doll on the outside, which is synonymous with different dimensions existing one within the other, our gross manifest world being the one on the outside !

Marina, can you please sing this next symbol.

MARINA SINGS AUM

Let's now look at some more details in the art piece, 'Circle of Immortality'.

SHOW CIRCLE OF IMMORTALITY PICTURE 1 – SPIRAL REFLECTED IN MIRROR

We know there is nothing actually present within the mirror, yet something appears.

SHOW COI PIC 2 – UNDERNEATH OF IMAGE, NO REFLECTION

And when it appears, it creates a new shape, that of an octahedron.

SHOW OCTAHEDRON PIC

QUESTION: What do you think this shape represents?

The spiral sitting on top of the mirror represents our conscious thinking and its reflection in the mirror demonstrates how our thinking is directly reflected into the world around us.

Because as we have seen in the 2 keys, 1 lock and the AUM picture, the world around us is arising and dissolving according to the collective conscious thinking of all living beings.

Another of my photographic art pieces takes this point further.

RAINBOW SYMPHONY

The name of this piece "Rainbow Symphony" is exactly what it says; sound and light merged together in union.

Marina, please sing the symbol.

MARINA SINGS

Each point of light that makes up appearance has exactly the same internal make up and we need to become familiar with this vibratory seed pattern.

Just as the seed of a flower contains the flower within it, so does this vibratory seed of potential contain the universe within it when it becomes activated.

QUESTION: So what activates it?

It is activated by how each one of us thinks.

You will see the golden spirals of the Circle of Immortality art piece that we saw just now, in here too.

These represent our thinking and here they are the motor of consciousness driving this seed of universal potential into action.

There are 2 tetrahedron shapes here too; one white and one red.

Each of them has 4 points, making 8 points in total.

And the 64 triangles around the edge of the pictures are the square of 8, displaying the next level of exponential growth of the universe.

After that will be 64 squared, making 512 etc... until the entire matrix of the universe comes into being.

Consciousness shines within that matrix and whatever consciousness projects will appear.

And it can expand and contract as much as its inhabitants THINK it into being.

MEDITATION

Now I want you all to imagine you are sitting in the centre of this picture.

From your centre, you should send out vibrations that make up an 8 pointed star around you, like the one in the picture.

Please just imagine it there.

Then from each of these 8 points come another 8 pointed star, so that in total you are surrounded by 9 stars.

Can you please hold that vibration for a little while.

What we have just done is to start to create the entire universe.

But it doesn't happen that slowly, and it doesn't stop at 9 points.

Can you now imagine that in a fraction of a second, billions upon billions of these vibrations expand into space creating such a vast universal matrix that you cannot even begin to comprehend its size.

Be careful how you think, because everything and I mean every vibration you emit will have an effect on how your universe appears.

This is the absolute law of cause and effect.

Now we are being artists of reality and the true artist can paint whatever picture he or she wishes just through knowing how to play the musical instrument of consciousness.

Consciousness is energetically vibrating in different octaves of resonance, each octave pertaining to a different dimensional state of existence.

Here another of my photo collage art works demonstrates this.

SHOW EYE PIC

The name of this piece is "Pure Vision transformed into Organised Confusion".

Here I display harmonic resonance in relation to our DNA.

QUESTION: Can you see how DNA is portrayed in the picture?

Indeed, you can see the photo strips portraying strands of the DNA double helix spiraling around the central image.

And this picture is just a segment in a chain that goes on and on.

SHOW CHAIN OF EYE PIC

The ultimate message in these pictures is to become a compassionate and wise artist.

You can do this, because compassion relates to our 'light' aspect and wisdom, to that of 'sound'.

Through shining your beautiful consciousness onto the universal frame with these inherent instruments of yours, you too can create a beautiful and harmonious world.

You are the artist ! Go and paint beautiful pictures !
