Ancient TIME-TRAVEL Technology?

William Henry Explores The Astonishing Wormhole Dance of the Dervish Sages

THE WORMHOLE POSSIBILITIES

THE CONCEPTION of a wormhole through time is an ancient idea, known as the "portal" in the Book of Enoch. It is the possibility of whether or not it is possible to travel through time is getting a fresh look these days. In fact, it's becoming an important research priority for NASA and other agencies in the U.S. and around the world. In fact, it's becoming an important research priority for NASA and other agencies in the U.S. and around the world. Octaves of Harmonic Resonance

1 keynote expands into an octave of 7 original notes before the 8th repeats the first note at a 'higher' level)

3 of these octaves = $(7 \times 3 + 1) = 22$ notes

π

$22/7 = \text{Pi}$ (an irrational number that makes it transcendental, we'll round off to 3.14 here) corresponding to the 22 functional pairs of Chromosomes of the human DNA whereby the 23rd does not have a function per se, but defines the gender of the physical form)

3 main octaves expand to 9

9 octaves

The 4 Do's are the 4 base notes,
the kayas of existence

Movement between dimensions through vortices

Aspects of the same fundamental essence appear within varying octaves of harmonic resonance.

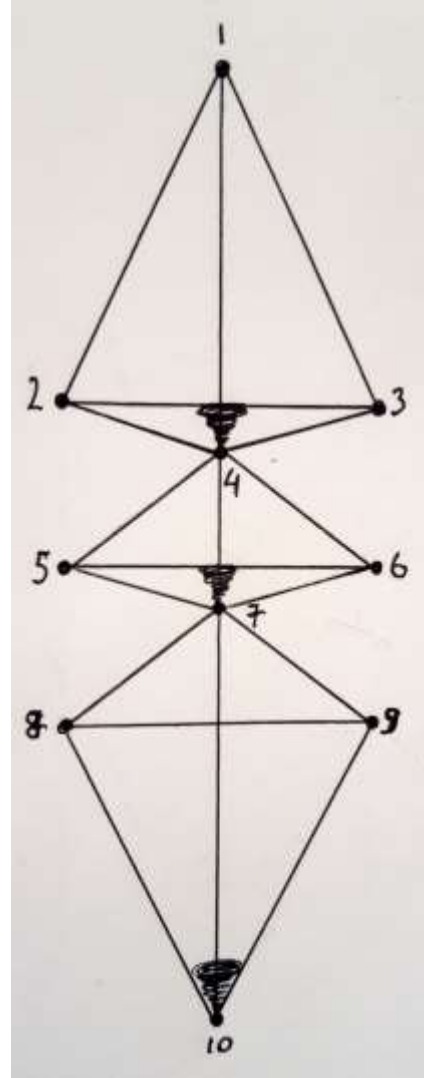

From a state of
Luminous Emptiness...

5 peaks of Brain Waves (of bliss) being measured in golden ratio frequency (Dan Winter)

A Healthy Heart is a Fractal Heart !

**Nested toroidal fields, recursively imploding in an infinite fractal field
(Dan Winter)**

You can only get an infinite number of harmonics to rest at one point, when knitted by Phi, ie. 'Phi-knit' = IN-FI-NITE !
(quote and pic from Dan Winter)

What happens next?

By creating a magnetic field around the heart in the way described above, this affects the way that DNA is braided.

Implosion in the DNA
(Dan Winter)

How does this refer
to death?

Highest realisation of the spiritual practice, The Rainbow Body.

3 types of rainbow body:

- Small rainbow body when the practitioner's body shrinks, sometimes to that of a baby and smaller in 1 - 3 weeks
- Medium rainbow body when the practitioner leaves only hair, nails and teeth, the rest of the body disappears
- Highest level of Rainbow Body when the practitioner completely vanishes when the master is already enlightened and the nature of the physical body is already in the light

But how does it occur?

The numbers 5 & 6

We've already seen the number 5 and 6 as a reoccurring theme in our description of the mechanisms of reality in Bardo Thodol.

- 5 elements, aspects of building ego-consciousness, colours, senses, wisdoms etc...
- 6 Bardos and 6 realms

Relationship between:

a 6 – sided hexagon

and

a 5 – sided pentagon

Relationship between the numbers 5 and 6 starts at the very fundamental level, where we see pentagons and hexagons pervading our DNA/RNA.

Here we see:

- In the **6 REALMS** that our conscious frequency may get entrapped in and **6 BARDO** states of Samsara that run in a macro sense throughout our existence and in a micro sense, through our moment to moment thought process, charge is held, or rather 'stuck' within those frequencies of existence and cannot escape...
- until we work to transform the **5 EGO CONSCIOUSNESS** and **ELEMENTS** into the 5 wisdoms and 5 purified elements in order to release it.

Hertzian waves

Common forms of energy like light, heat, sound and electricity both have particle and wavelike properties and can be measured in terms of amplitude and frequency.

They are also known as 'Transverse' waves and require time and effort to move through space.

Non-Hertzian (Scalar/longitudinal) waves

They are closer in their properties to magnetism and are created when 2 common electro-magnetic waves come together from 2 opposite converging vectors.

Longitudinal waves are more field-like than wave-like and expand outwards in circles of energy, like a pulse, reaching everywhere, immediately.

But how is this precisely done?

Hertzian to non-Hertzian (longitudinal wave conversion) (Dan Winter)

To convert transverse waves to longitudinal, you must make an antenna, a spiral on a cone...

We see this symbolically represented in the shape of the VAJRA, a ritual instrument used by Tibetan Lamas with 5 prongs on either side of its central part.

Indeed, the Hevajra Tantra tells us that “If you can understand the meaning of the VAJRA, you can understand the meaning of the Nature of Reality”

Lower pic from Dan Winter

Enter the
Peaceful and Wrathful Deities
of the Bardo of Dharmata
Of Bardo Thodol...

“when rotation (spin) is nested in this way, it creates rose-like fractal/conjugate patterns of implosive centripetal charge.

MAGNETIC LINE CROSSINGS ARE DODECA-ICOSA & FRACTAL – civilisation knows this, because DNA radio depends on embedding in that longitudinal grid.

City of Prague

Mandala of Peaceful and Wrathful deities

4 wave phase conjugate mixing
(Dan Winter)

Ultimately...

Because everything is created by mind, everything
can be destroyed by mind.
